

Creating a Rental Agreement

This process will guide you through creating a rental agreement using a digital model named Creative Writer. By following these steps, you will be able to generate and customize a lease contract efficiently.

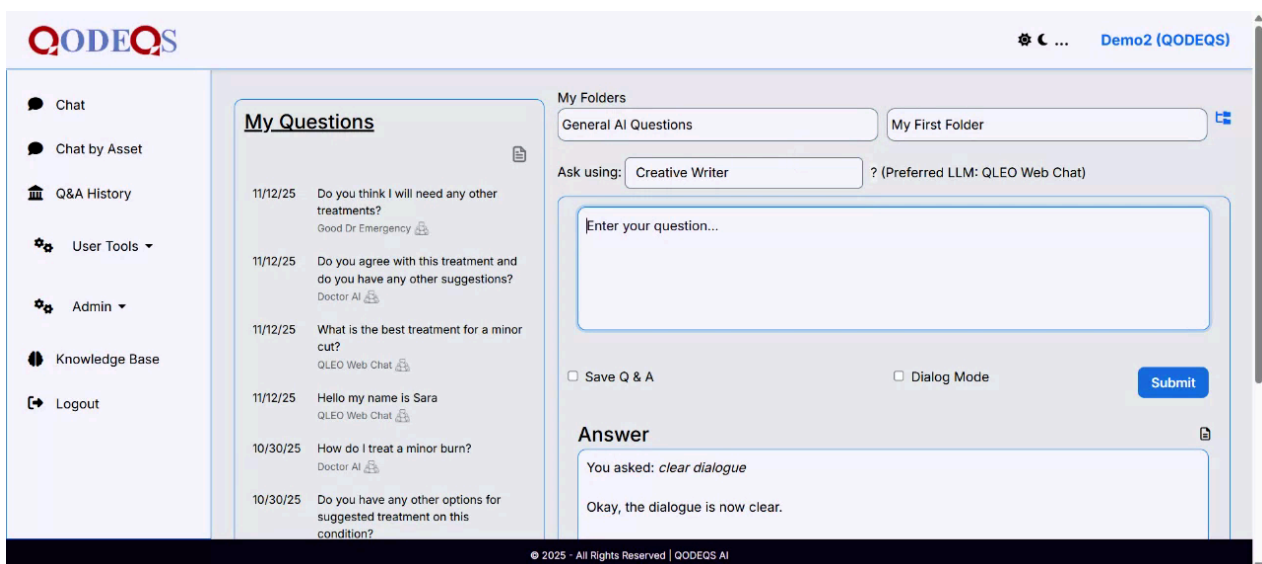

Step 1

Open the folders and chat page. For this example, we will create an apartment lease for one year. We will use the Creative Writer model to achieve this.

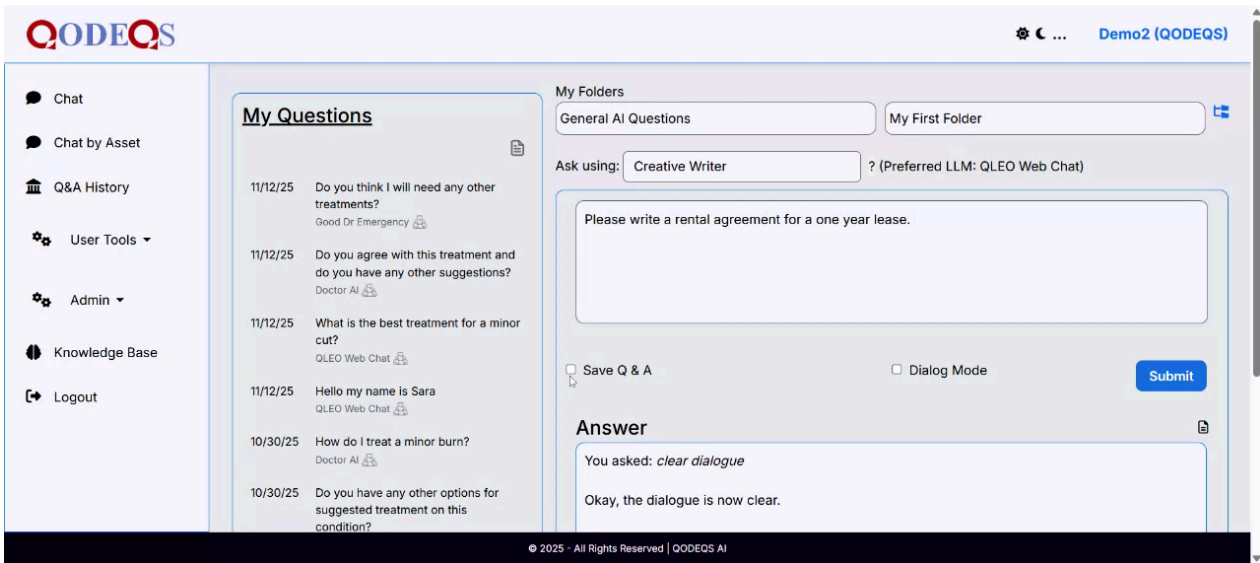

Step 2

This method is particularly effective for generating contracts.

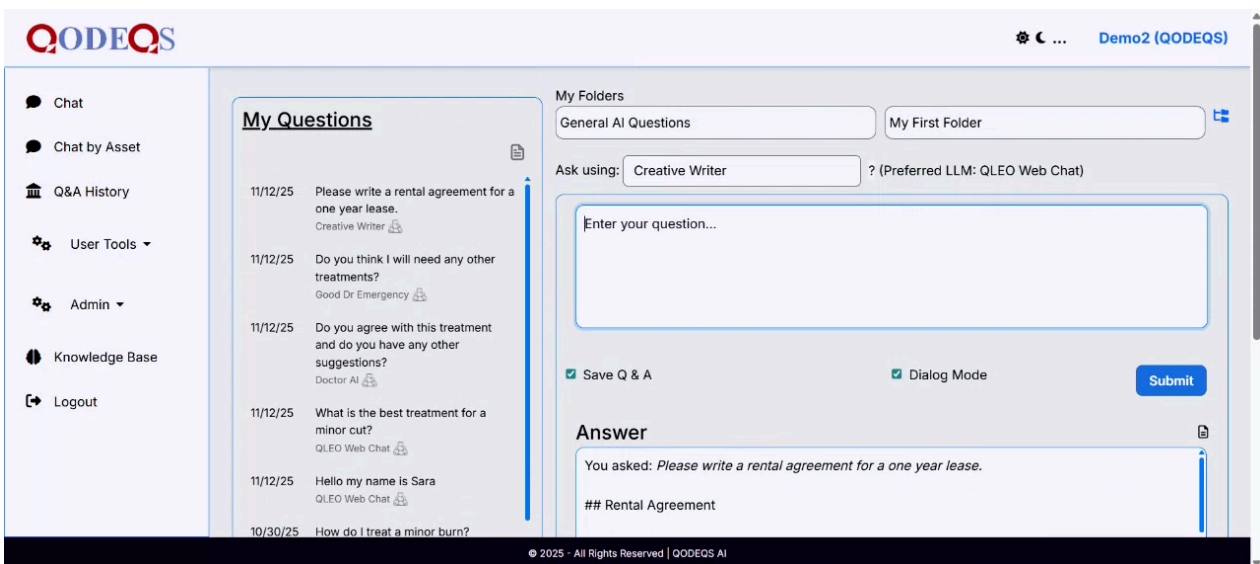

Step 3

Request Creative Writer to draft a rental agreement for a one-year lease. Save your questions, answers, and dialog mode if you wish to ask additional questions to other models.

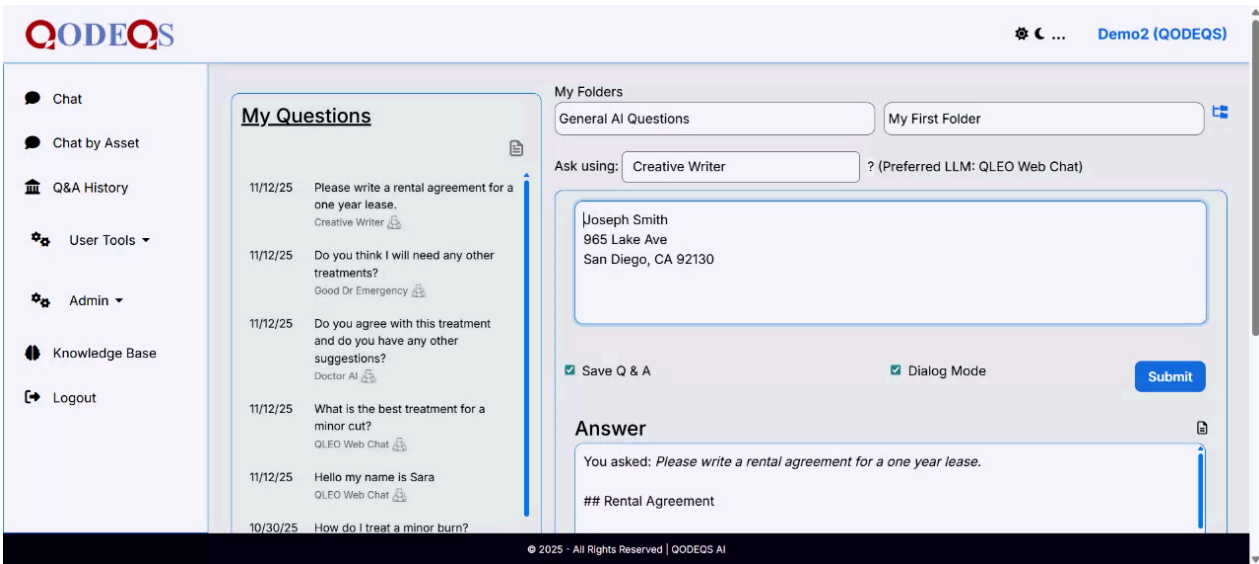

Step 4

Click the blue submit button and wait for the rental agreement to appear at the bottom. Scroll down to see the generated rental agreement, which includes spaces for landlord, tenant, and other pertinent information. You can add or edit these details. In this example, we will add the landlord's details.

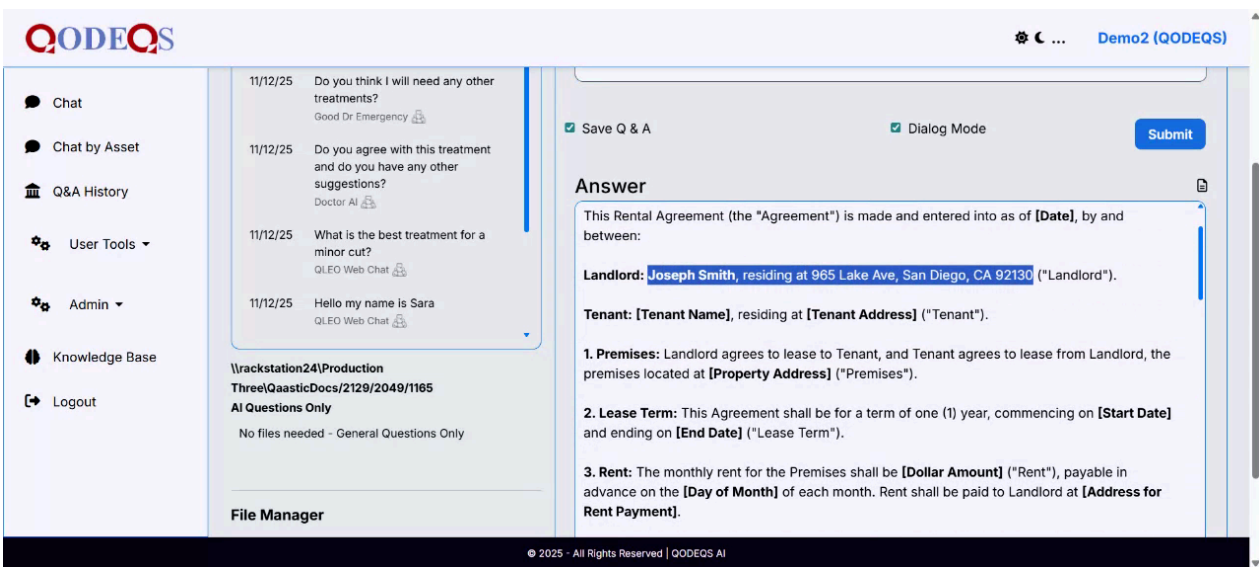

Step 5

We will specify the landlord's name as Joseph Smith, residing at 965 Lake Avenue, San Diego, California, 92130. Request Creative Writer to add this landlord information and then submit.

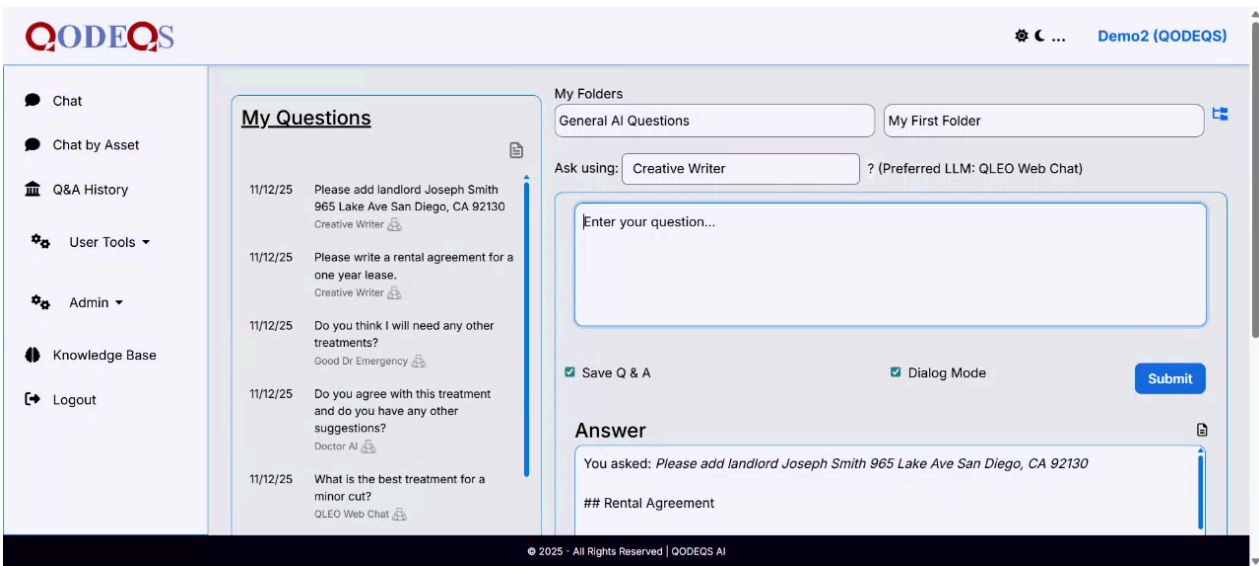

Step 6

As the document updates, the requested landlord information—Joseph Smith, 965 Lake Avenue—will be included.

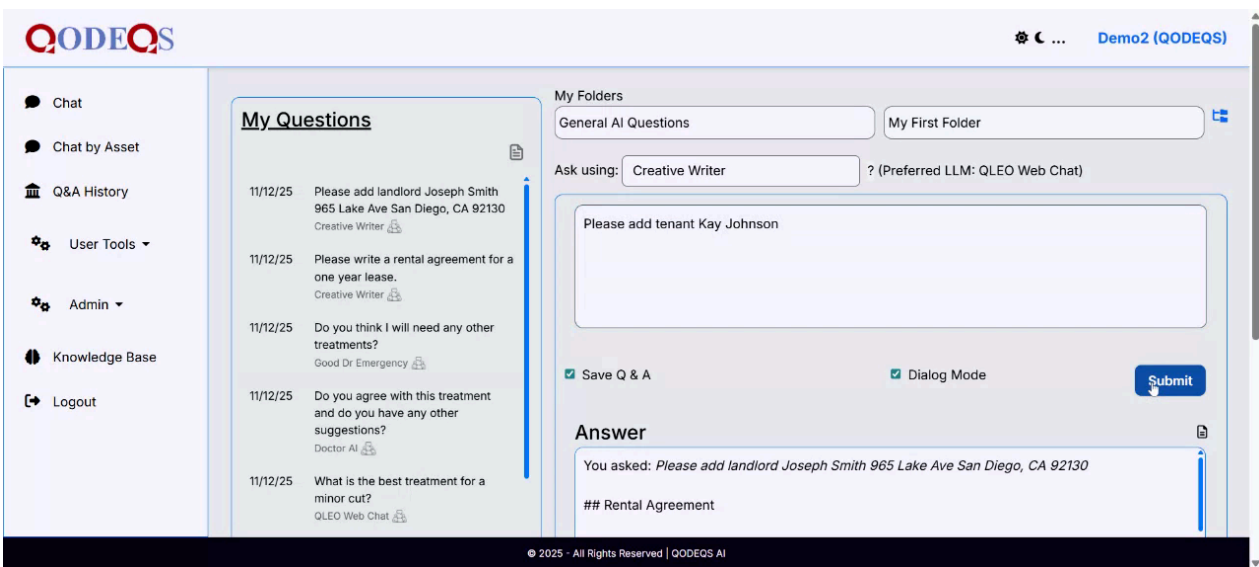

Step 7

Next, request Creative Writer to add the tenant's details.

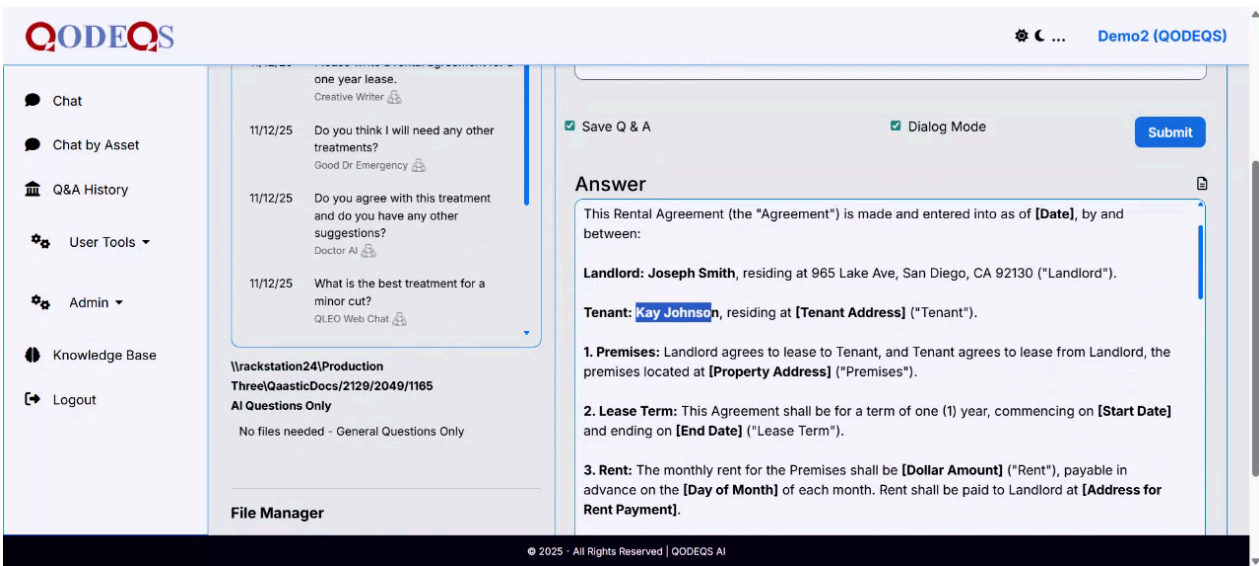

Step 8

Add tenant Kay Johnson to this agreement. Submit the changes and wait for the report to update.

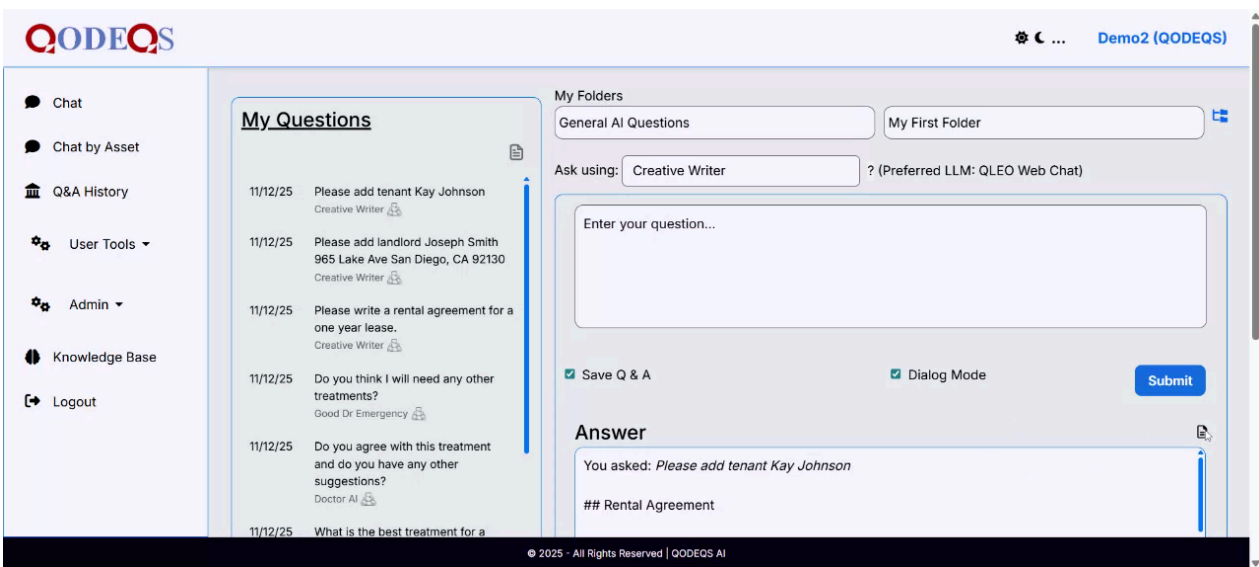

Step 9

Verify that Kay Johnson has been added as the tenant. You can request further modifications if needed.

Step 10

Once you complete your document, navigate to the right side and click the page button. This action will display your document on a blank page with options.

Step 11

You will have the capabilities to copy, print, and edit the document.
