

Efficient Model Search

This document provides a concise walkthrough for performing a model search. Follow these steps to effectively find and select the best model based on your needs.

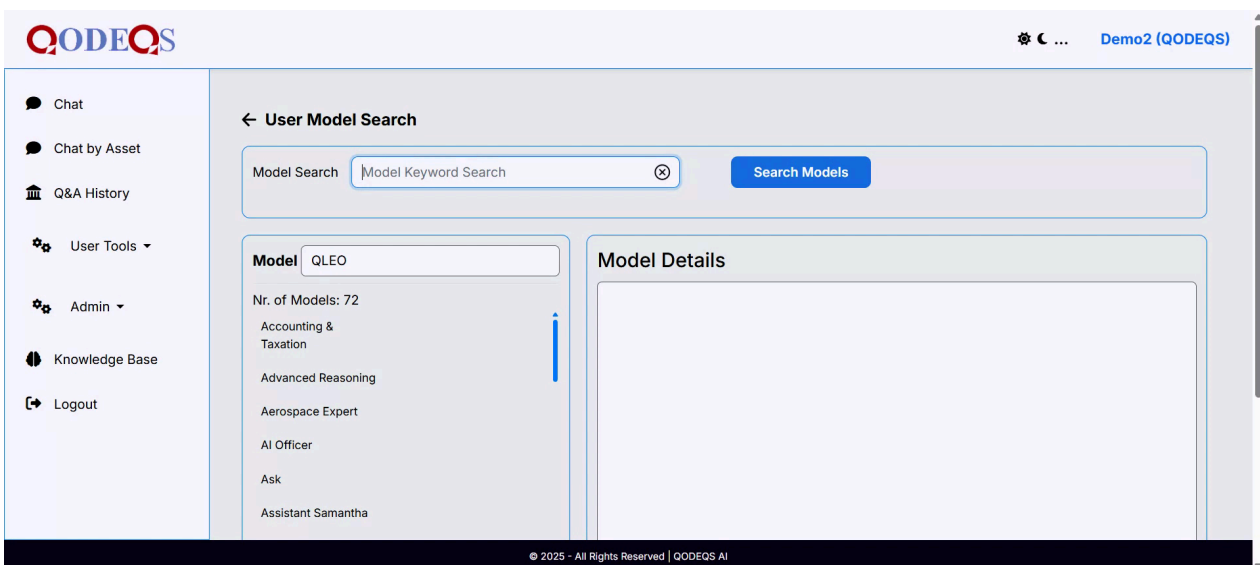

Step 1

Begin by navigating to the 'User Tools' section, where you will find the 'Model Search' option. Selecting this option will initiate the model search process.

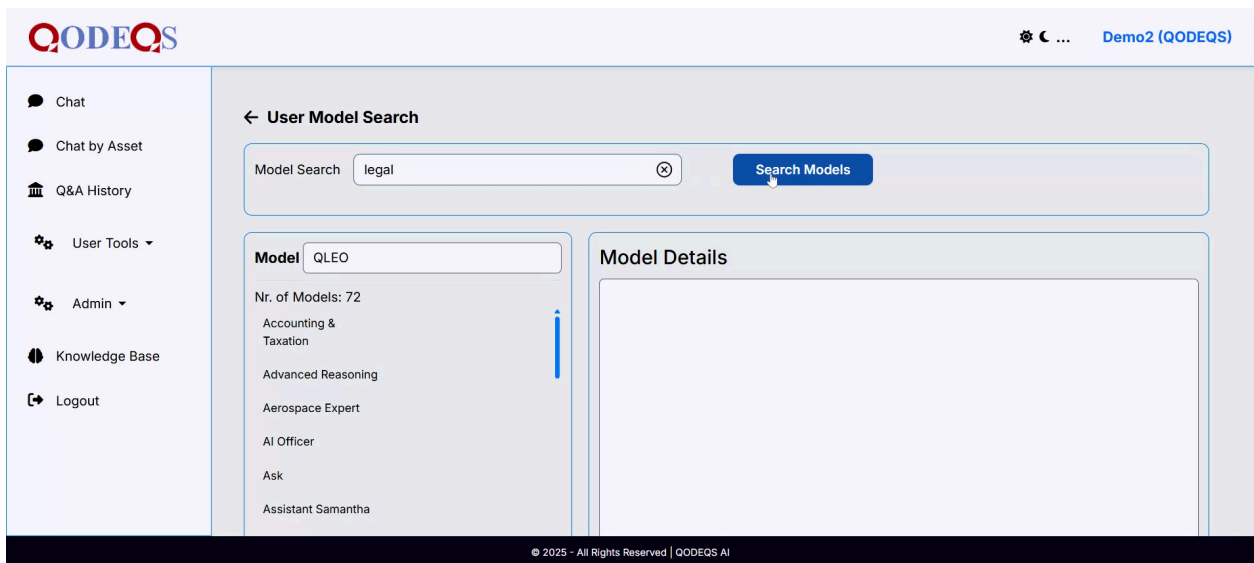

Step 2

Upon reaching the Model Search page, locate the search box. Enter your query into this box to proceed with finding relevant models.

Step 3

For instance, if conducting legal research, type the keyword related to your search, such as "legal," and then click on 'Search Models' to initiate the search.

Step 4

After the search, the page will display a list of models that are most suitable for addressing legal questions. In this example, a total of eight models are available for legal inquiries.
